CITY OF MARGATE CITY
FLOODPLAIN DEVELOPMENT PERMIT*
 (See Terms and Conditions)

**Permit becomes void if there are changes to the effective Flood Insurance Rate Maps.*

PROPERTY ADDRESS: _____

The **Floodplain Development Permit** is the mechanism by which the City of Margate evaluates any and all impacts of activities proposed within New Jersey regulated floodplains and FEMA's Special Flood Hazard Areas (SFHA's). All activities must be in compliance with the City of Margate's Floodplain Damage Prevention Ordinance. The National Flood Insurance Program provides flood insurance to individuals at much lower premiums than could otherwise be purchased through private insurers, and makes certain federal funds available to local communities. In order for citizens to be eligible for the national flood insurance rates, or for communities to receive certain kinds of federal funds, the Community must agree to meet minimum floodplain standards. This application packet is a tool to ensure that the City of Margate's Floodplain Damage Prevention Ordinance is met.

Any development that occurs within a designated floodplain must obtain a Floodplain Development Permit prior to the work commencing. In Title 44 of the Code of Federal Regulations part 59.1, FEMA defines development as: *Any man made change to improved or unimproved real estate, including but not limited to buildings or other structures, mining, dredging, filling, grading, paving, excavation or drilling operations or storage of equipment or materials.* Other human activities that are considered development include but are not limited to: alterations of a structure through additions, demolition and/or remodeling; fences; retaining walls; moving/placement of manufactured or mobile homes; campgrounds; storage of equipment, vehicles, and/or materials (storage yards, salvage yards).

General Provision of the Floodplain Development Permit Terms (applicant to read and sign):

1. No work may begin until a floodplain development permit has been issued.
2. The permit may be revoked for any of the following reasons:
 - a. Any false statements are made herein.
 - b. The effective Flood Insurance Rate Map has been revised.
 - c. The work is not done in accordance with the City of Margate's Floodplain Damage Prevention Ordinance or other local, state and federal regulatory requirements.
 - d. The work is different than what is described and submitted to the City as part of the Floodplain Development Permit application.
3. If revoked, all work must cease until permit is re-issued.
 - a. If the permit cannot be re-issued, applicant acknowledges that they will be responsible to correct the issue which may require removal of any development that may have occurred.
4. Development shall not be used or occupied until the project has received final inspection, a final elevation, and approval by the City.
5. The permit will expire if no work is commenced within six (6) months of issuance and by the expiration date noted on the permit.
6. Applicant is hereby informed that other permits may be required to fulfill local, state, and federal regulatory requirements and acknowledges that it is their responsibility to ensure that all necessary permits are obtained.
7. This includes but is not limited to documentation showing compliance with the endangered species act.
8. Applicant hereby gives consent to the Local Floodplain Administrator and their representative (including state and federal agencies) to make reasonable inspections required to verify compliance.
9. I, the Applicant, certify that all statements herein and in attachments to this application are, to the best of my knowledge, true and accurate. Furthermore, I have read and understand the City of Margate's Floodplain Damage Prevention Ordinance and will adhere to the ordinance and will/have obtain all necessary state, federal, and local permits for the proposed development.

Floodplain Development Permit Checklist

The following documents are required for all floodplain development permits:

- Site plan from Recorder's office**
- Elevation Certificate (both a pre-construction and, upon completion, a post-construction Elevation Certificate)**
- Maps and/or plans showing the location, scope and extent of the development**

The following documents may be required:

- Floodproofing Certificate (*certificate and supporting documentation used to provide the certification*)
- Certification by a registered professional engineer or architect that the floodproofing methods for any non-residential structures meet the floodproofing criteria in Article V.
- A description of the extent to which any watercourse will be altered or relocated as a result of proposed development.
- Detailed hydraulic and hydrology model for development in Zone A
- Structure valuation documentation: An estimate prepared by an estimating firm of the total cost of building improvements using qualified labor and materials obtained at market prices or a similar estimate signed by a bona fide contractor bid.
- Non-conversion agreement (*required for all structures that are constructed with an enclosure greater than 6' in height as per NJAC 7:13 12.5(p)6*)
- Copies of all Flood Hazard Area Control permits.

Review Comments

PERMIT ACTION:

- PERMIT APPROVED:** The information submitted for the proposed project was reviewed and is in compliance with approved floodplain management standards.
- PERMIT APPROVED WITH CONDITIONS:** The information submitted for the proposed project was reviewed. In order for the proposed project to be approved, certain restrictions or conditions must be met. These restrictions or conditions are attached.
- PERMIT DENIED:** The proposed project does not meet approved floodplain management standards (explanation on file).
- VARIANCE GRANTED:** A variance was granted from the base (100 year) flood elevations established by FEMA consistent with variance requirements of Title 44 of the Code of Federal Regulations part 60.6 (variance action documentation is on file).
